SUMMARY

Frontend Engineer with 3+ years of experience across SaaS, mobile, and full-stack development using JavaScript, TypeScript, Vue.js, React.js, and Flutter. Skilled in Agile Scrum environments, translating complex technical requirements into scalable, user-centric solutions. Experienced in leveraging AI-assisted development tools (Gemini, Copilot, Claude, ChatGPT) to accelerate refactoring, improve code quality, and increase delivery speed. Proven track record of boosting frontend performance by 50% and delivering seamless REST API integrations with MYOB, Xero, and Autodesk.

WORK EXPERIENCE

Mid-Level Frontend Engineer — Dibasys Pvt Ltd, Kottayam, Pala

Dec 2023 – Jun 2026

- Drove software delivery within an Agile Scrum framework, facilitating daily stand-ups and sprint planning that increased on-time project delivery by 25% across the full product lifecycle.
- Articulated technical requirements to cross-functional teams, ensuring seamless integration of SaaS platforms and mobile apps while reducing post-deployment bugs by 20%.
- Presented frontend performance optimization strategies to senior management using JavaScript and Vue.js, achieving a 50% increase in page load speed.
- Authored technical documentation and internal guidelines for AI-assisted development tools (Gemini, Copilot, Claude, ChatGPT), improving team refactoring efficiency by 35% and increasing sprint velocity.
- Identified and resolved 15+ production-critical bugs per quarter, ensuring application stability and minimal downtime for end users.
- Designed UI/UX for SaaS and mobile applications in Figma, translating prototypes into intuitive, user-centric interfaces.
- Built and maintained the company's product website using Nuxt.js and Webflow, ensuring responsive design and consistent brand presentation.
- Engineered core SaaS attendance features — map-view location tracking, timesheets, invoicing — with REST API integrations with Xero, MYOB, and Autodesk.
- Built and shipped a Flutter mobile application covering employee check-in/check-out, timesheet creation, and geofence-based attendance tracking.

Software Developer — Codea Technologies Pvt Ltd, Kochi

Jan 2023 – Nov 2023

- Collaborated with stakeholders to define requirements for an IT Help-desk web application, improving ticket resolution efficiency by 20%.
- Presented database optimization findings to the backend team, reducing data retrieval time by 15% through streamlined PostgreSQL queries.
- Led design reviews for responsive, mobile-first interfaces, increasing cross-device user engagement by 30%.

MEARN Stack Developer (Intern) — Luminar Technolab, Kochi

Oct 2022 – Jan 2023

- Demonstrated project milestones by presenting 5+ full-stack web applications to project mentors, ensuring all end-to-end API integration requirements were met.
- Facilitated feedback sessions with team leads to refine responsive layouts using Bootstrap, reducing development time for new prototypes by 40%.

EDUCATION

BSc Electronics — Mar Augusthinose College Ramapuram (MG University)

May 2019 – Apr 2022 | CGPA: 7.4 / 10

SKILLS

Languages & Frameworks: JavaScript, TypeScript, HTML, CSS, Vue.js, React.js, Nuxt.js, Shadcn Vue

Mobile, UI/UX & Tools: Flutter, PWA, Figma, GSAP, Git, GitHub

Web, APIs & Deployment: Bootstrap, Tailwind CSS, REST APIs, Webflow, Netlify, AWS Cloud Storage, DNS
