SUMMARY

Frontend Engineer with 3+ years of experience across SaaS, mobile, and full-stack development, including hands-on work as a Mid-Level Frontend Engineer architecting scalable SaaS and mobile solutions using Flutter and Vue.js. Skilled in Agile Scrum environments, with strong ability to communicate complex technical requirements to stakeholders to drive high-impact outcomes. Experienced in leveraging AI-assisted development tools (Gemini, Copilot, Claude, and ChatGPT) to accelerate refactoring, improve code quality, and increase delivery speed. Proven track record of boosting frontend performance by 50% and delivering seamless integrations with MYOB, Xero, and Autodesk. Collaborates closely across design and engineering teams to transform Figma prototypes into robust, user-centric interfaces, with additional experience in UI/UX design, website development, and digital marketing support.

WORK EXPERIENCE

Mid-Level Frontend Engineer, Dibasys Pvt Ltd, Kottayam, Pala

Dec 2023 - Jun 2026

- Drove software delivery within an Agile Scrum framework, facilitating daily stand-ups and sprint planning that increased on-time project delivery by 25% across the full product lifecycle.
- Articulated technical requirements to cross-functional teams, ensuring seamless integration of SaaS platforms and mobile apps while reducing post-deployment bugs by 20%.
- Presented frontend performance optimization strategies to senior management, achieving a 50% increase in page load speed and successful third-party ecosystem integrations.
- Authored technical documentation and internal guidelines for AI-assisted development tools (Gemini, Copilot, Claude, ChatGPT), improving team refactoring efficiency by 35% and increasing overall sprint velocity.
- Identified and resolved production-critical bugs, ensuring application stability and minimal downtime for end users.
- Contributed actively to team discussions and feature testing cycles, supporting quality assurance and smooth release cycles.
- Designed UI/UX for SaaS and mobile applications, translating Figma prototypes into intuitive, user-centric interfaces.
- Built and maintained the company's product website using Nuxt.js and Webflow, ensuring responsive design and consistent brand presentation.
- Created marketing posters and contributed to digital marketing initiatives, supporting campaigns that helped improve product sales.
- Developed and maintained core SaaS attendance features, including map-view location tracking, timesheets, invoicing, and third-party integrations with Xero, MYOB, and Autodesk.
- Developed and maintained a Flutter mobile application covering employee check-in/check-out, timesheet creation, and geofence-based attendance tracking.

Software Developer, Codea Technologies Pvt Ltd, Kochi

Jan 2023 - Nov 2023

- Collaborated with stakeholders to define requirements for an IT Help-desk web application, improving ticket resolution efficiency by 20%.
- Presented database optimization findings to the backend team, reducing data retrieval time by 15% through streamlined PostgreSQL queries.
- Led design reviews for responsive, mobile-first interfaces, increasing cross-device user engagement by 30%.

MEARN Stack Developer (Intern), Luminar Technolab

Oct 2022 - Jan 2023

- Demonstrated project milestones by presenting 5+ full-stack web applications to project mentors, ensuring all end-to-end API integration requirements were met.
- Facilitated feedback sessions with team leads to refine responsive layouts using Bootstrap, reducing development time for new prototypes by 40%.

EDUCATION

Mar Augusthinose College Ramapuram (MG University) - BSc Electronics

May 2019 - Apr 2022

CGPA: 7.4

SKILLS

Frontend Frameworks & Libraries: Vue.js, React.js, Nuxt.js, Shadcn Vue

Web Fundamentals: HTML, CSS, Bootstrap, Tailwind CSS

Mobile & Cross-Platform Development: Flutter, PWA

UI/UX Design: Figma

Version Control: GitHub

Animation: GSAP

Deployment, Hosting & Infrastructure: Webflow, Netlify, AWS Cloud Storage, DNS
